animeo IB+ Touch Building Controller

You know...

the benefits of control units for managing building façades. They are used to activate motorised solar shading devices automatically with connections to various sensors, and set them in the ideal position according to changes of the weather condition.

But do you know...

about the new touch control unit: animeo IB+ Touch Building Controller?

Both intuitive control interface...

with its fluid, sophisticated design, user-friendly graphical interface and its customised functions, all at your fingertips.

...and assisted control unit

with its built-in co-pilot that offers you a step-by-step guide for remote implementation and maintenance you can do blindfold.

A new experience for professionals...

Ready-to-fit: less cabling, quick handling, reliable system.

Ready-to-configure: easy and unique allocation of motors/ façades, fast software upgrade and remote maintenance.

Ready-to-use: touchscreen interface with personal assistant.

animeo IB+ Touch Building Controller makes your work easy and profitable.

And for even greater support, Somfy is with you, before, during and after...

Audit and specifications, support with planning, commissioning and remote maintenance.

A new experience for users...

Ready-to-work + greater thermal and visual comfort with equipment which adapts continually to a changing environment.

Ready-to-save + better energy performance in the building thanks to precise management of solar shades to the nearest degree.

Ready-to-serve + safety for solar shading devices and well-being for building occupants.

An easy-to-use interface + local control with wall-mounted handheld unit accessible for each person.

DESIGNED FOR SMALL AND MEDIUM SIZED COMMERCIAL BUILDINGS

- > Four individually configurable zones.
- > Applicable for any interior and exterior application: venetian blinds, screens, roller shutters, roller blinds and window openers.
- > Fundamental and advanced functions:
 - Sun tracking: for optimal visual comfort as the sun moves across the sky.
 - Protection: to secure the shades in case of high winds, rain, frost, fire...
 - Display and saving 3 months' worth of data: events, settings, sensor values, etc.
- > Several units can interact with a single weather station.
- > Compatible with all animeo IB+ Motor Controllers and the new 2-wire IB+ bus technology.
